- **Front-End Development:** HTML5, CSS, SASS/SCSS, JavaScript, React.js, Redux, Next.js, React Native
- **Back-End & Databases:** MySQL, Python, Django, Supabase
- **Tools:** Git, Webpack, WordPress, Contentful; Figma, Adobe XD, Photoshop, Chrome DevTools,
- **Soft Skills:** Problem-Solving, Code Optimization, Attention to Detail, Adaptability, Team Collaboration

## WORK EXPERIENCE

### Self-Employed - *Front end developer*

Ljubljana, Slovenia • Jan 2024 – Present

Design and develop custom, high-performance web interfaces for small businesses and startups using **React**, **Next.js**, and modern **UI frameworks**.

- Delivered responsive, SEO-optimized websites and landing pages improving conversions and engagement.
- Built modular React components to accelerate development and ensure scalability.
- Integrated REST and GraphQL APIs for dynamic, data-driven user experiences.
- Optimized applications for performance and accessibility, improving overall user experience and engagement.
- Consulted clients on UX/UI best practices, helping translate business goals into intuitive digital products.

### TriTim - *Front end developer*

Ljubljana, Slovenia • March 2023 – Dec 2024

Led the front-end **redesign** of the company's **custom CMS** using **React**, improving usability and user satisfaction by 35%.

- Refactored legacy front-end code and implemented a fully responsive layout, boosting mobile engagement by 25%.
- Developed internal tools and React Native apps that streamlined operations and improved workflows.
- Integrated third-party APIs (payment gateways, social media, cloud services), expanding product capabilities.
- Optimized the applications for cross-browser and cross-device compatibility.

Created custom **WordPress** and **front-end solutions** emphasizing responsiveness, accessibility, and performance.

- Built a custom WordPress starter theme using the Options API, cutting setup time by 50%.
- Developed responsive, SEO-friendly websites that increased mobile traffic and engagement.
- Led redesign of the agency's main website, improving navigation and brand consistency.
- Collaborated across design and development teams to deliver high-quality digital experiences.

## **PROJECTS**

---

- **Land of Celje | JS, ASP.NET:** Tourism Ticketing Platform.
  - Integrated Stripe, Google Maps, and Open-Meteo APIs for payments, navigation, and real-time weather.
  - Designed for scalability and heavy traffic during peak tourism seasons.
- **CoverLettr | React, Next.js + Contentful:** AI-Powered Cover Letter Generator.
  - Implemented dynamic forms, live text generation, and responsive UI.
  - Focused on intuitive UX and strong performance optimization.
- **Zupan.si | Python, Django + Wagtail:** E-Commerce for Agricultural Equipment.
  - Developed the front end and collaborated on back-end development for a full-featured e-commerce platform with a custom product configurator.
  - Built guided selection tools for complex machinery.

## **EDUCATION**

---

**B2 Higher vocational school - EQF level 5**

**Ljubljana, Slovenia • Sept 2021**

- **Information science engineer (VI/1)**
